

We live IT

Unit Solutions is an IT business situated in the Basel region of Switzerland. Many years of experience and extensive know-how are key to our realisation of current IT solutions for small and medium sized businesses, as well as for organisations, communities and cantons.

Our competencies encompass all phases of an IT project, from its conception through realisation, up to and including introduction, and continued support:

IT-consultation

Software development

Introduction and training

Support

We are committed to the role of reliable and competent partner for our customers. Flexibility and a close-working relationship with the customer are our hallmarks.

For over 25 years we conceive and realize successfully challenging IT solutions. They are characterized by:

- **Clear concepts**
- **Fair, predictable prices**
- **Flexible, thought-out solutions**
- **Development partnerships**

Take advantage of our core competencies:

- **Requirements analysis**
- **Project management**
- **Software architecture**
- **Software ergonomics**
- **Programming**
- **Quality assurance and testing**

IT-consultation

Software development

We advise and support companies in all areas of IT and provide them with good ideas and workable solutions.

Our know-how and our products can basically be used in all industries. The optimal implementation of the business processes is central to a practical solution.

The areas of application of our IT consultation include:

- Analysis of existing IT infrastructure
- Removing old systems and migration of data
- Design and maintenance of networks, data backup, IT infrastructure
- Introduction of IT solutions, support for training and Support
- Conception of new solutions (functional specifications, use cases, system architecture, databases and data modeling, integration)
- Development partnerships and Team supports

The areas of application of our software solutions include:

- Web-based solutions
- Mobile solutions
- Locating (geographical information systems GIS, drawings, 3D-models, photos, GPS)
- Evaluations and reports
- Integration
- Migration

Often, one finds outdated systems, which are difficult and complicated to maintain. This can have a blocking effect on other, new systems,

- **Obsolete systems**
- **System break**
- **Multiple data collection**
- **Difficult identification of information**

tems, for example, if they only work with an old operating system. High costs and a great amount of maintenance time are the consequences.

- **Loss of time**
- **Unsatisfied employees**
- **Quality problems**
- **Unsatisfied customers**
- **Blockades for the development of a company**

The problems are often recognized, but pushed out for reasons of cost and time. The consequences can be serious.

Our solutions for the maintenance of infrastructures are conceived to provide adaptability for the various sectors and can be implemented within a very short period of time. We have a Framework with all basic functions (Infra Basic).

The integration of GIS, drawings, photos, documents and addresses is standard procedure. All solutions may be augmented with fully integrated modules for mobile recording of inspection (Inspecto) and the recording of observations and events (Observe).

Test us free of charge

info@unit.solutions / +41 (0)61 486 66 00

- We offer you a first free consultation (approx. ½ day).
- Give us an insight into your current IT infrastructure and problems
- In a short report, we summarize the results and give hints on weak points and show where potential for improvement exists.

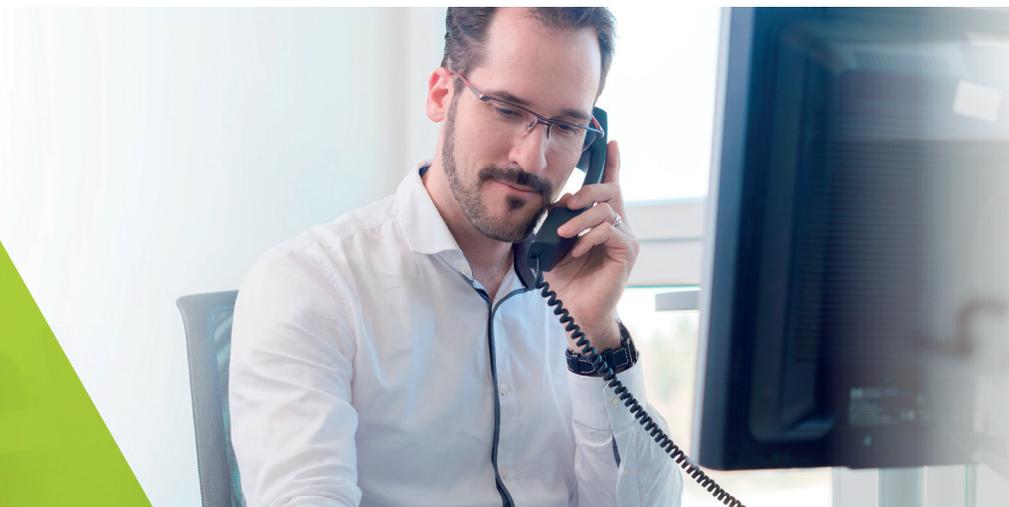

Introduction and training

The introduction is a process that needs to be well coordinated. The training program must be adapted to the needs of the user groups and be carried out promptly to productive operation in order to achieve the optimum benefit.

Training courses are designed to be exciting, practical and interactive. During and after the training, the participants have the opportunity to ask questions and to deepen their knowledge with exercises.

We are geared to your needs. We are flexible in the choice of the training location. Training courses can be held either in our training room or at the customer's premises.

Support

The development or implementation of an IT solution is the basis for the use in productive operation. It is important, however, to ensure this operation without interruption. Interruptions mean costs and disgruntled customers.

Problems with the IT infrastructure, such as the failure of servers, networks or the Internet, and operating problems must be fast and competent be resolved.

Our support is in a position to take over or support these tasks.
